

Cybersecurity Analyst III (VA24-01)

Description

Candidate will design, develop, implement, or recommend cybersecurity control solutions that ensure protection of information and systems in support of the DoD's Positioning, Navigation and Timing (PNT) Enterprise. Work focus areas include:

- Establish and satisfy complex enterprise-wide cybersecurity requirements based upon the analysis of user, policy, regulatory, and resource demands placed on DoD PNT systems.
- Plans and leads major work assignments within the office of the DoD Chief Information Office with a focus on the Global Positioning System (GPS) and other related PNT systems to be used by the warfighter.
- Identifies security risks, threats, and vulnerabilities of networks, systems, applications, and new technology initiatives and recommends mitigation measures.
- Applies expertise to government and commercial common user systems and dedicated special purpose systems requiring specialized cybersecurity features and procedures to include command and control-related networks.
- Conducts cyberthreat analysis and recommends security control solutions that ensure protection of information and systems.
- Promote PNT resilience through drafting / editing of white papers, reports, staff packages for senior DoD leadership with a focus on cybersecurity areas.

Location

Pentagon

Education and Experience

- Bachelor's degree in a cybersecurity related discipline, or any Bachelor's degree and cyber related certification of CISSP or higher.
- Ability to demonstrate ten (10) years of related experience.

Qualifications

Professional certifications may be substituted for cybersecurity

Required

- US Security Clearance TS/SCI eligibility.
- Ability to work in a team setting in a high-tempo environment is essential, along with strong communication and interpersonal skills.

Desired

The ideal candidate has a background that includes GPS control experiences and has prior Pentagon work experiences.
